The above graphic illustrates the key components of the 2019 Strategic Plan Recharge:

- At the center are organizing principles – common threads that run through all Rail~Volution programs and define the space where we operate – so we can fully realize our efforts to be a multi-program organization.
- These organizing principles guide the three Rail~Volution programs.
- The four components comprising the beige ring, as well as a conference strategic plan, are areas we want to strengthen and clarify both for ourselves and for others, so that we can lead in a more focused and well articulated way.
- The outcome is a clearer understanding of Rail~Volution’s work to foster equitable transit-oriented communities – livable places where people of all incomes, identities, and abilities can thrive.
